Directora Médica  
Servicio Nacional de Salud  
(NHS), Inglaterra

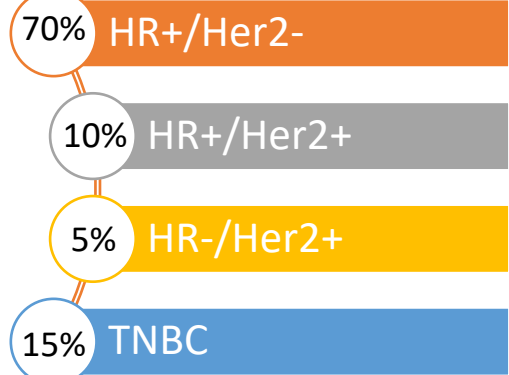

Routine DNA tests will put NHS at the 'forefront of medicine'

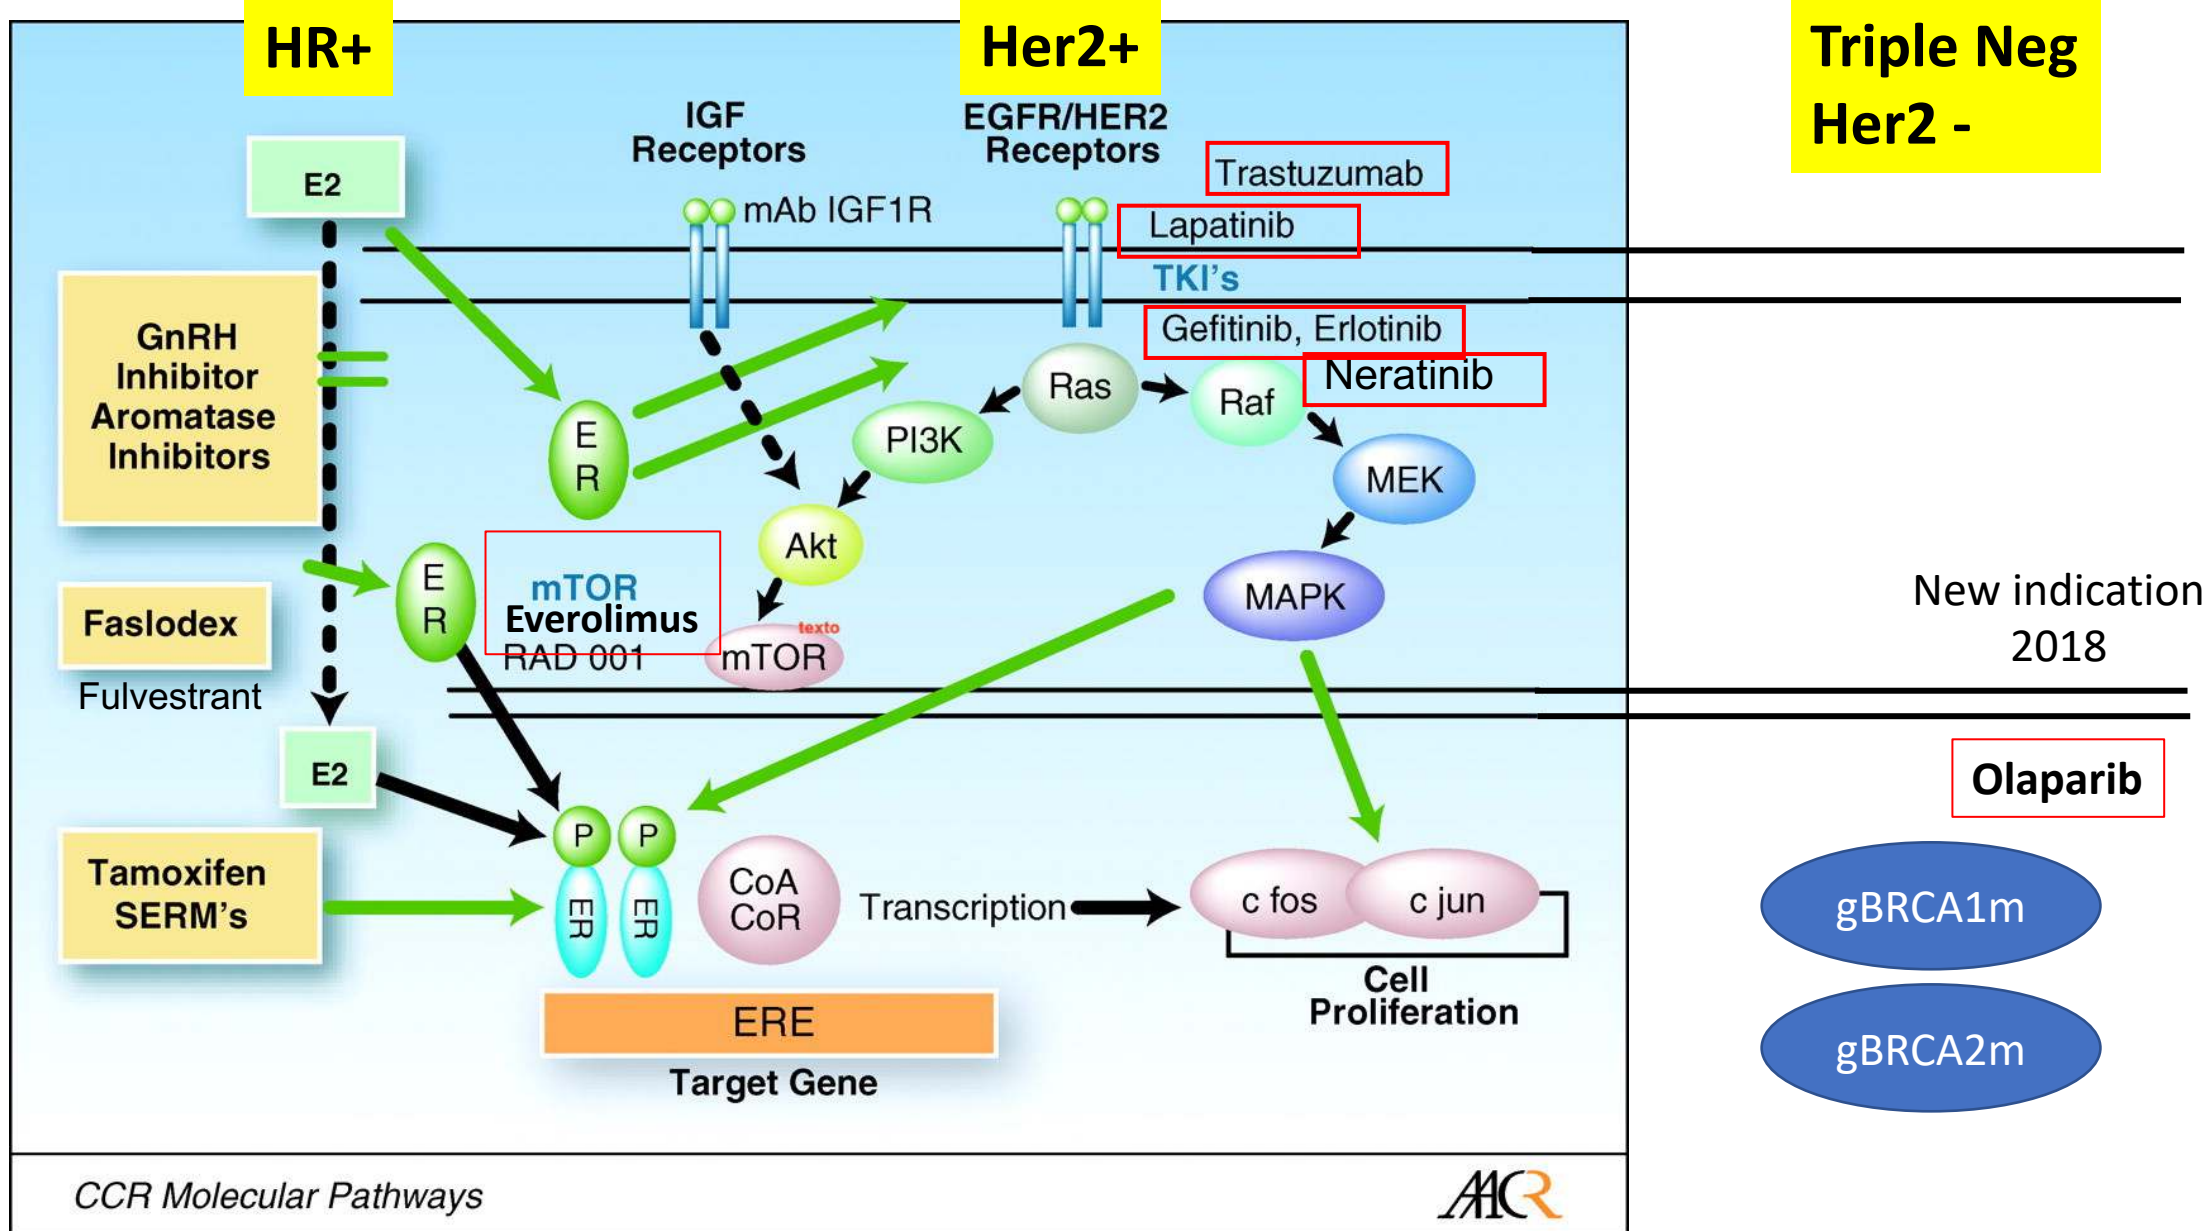

From 1 October new cancer patients will have tumours screened for key mutations

Todas tienen Cancer de Mama: todos son diferentes

## ERBB2 mut predice resistencia a Trastuzumab/Pertuzumab y sensibilidad a Neratinib/Lapatinib

- 3% en HR+, HER2-
- 36% en HR+, HER2+
- Mutaciones activantes

## Mutation Rates

### RIGHT:

- APC = 64%
  - TP53 = 56%
  - KRAS = 51%
  - BRAF = 25%
  - HER2 = 1%
- 
- MSI-H = 22%

↓ EREG/AREG

## Mutation Rates

### LEFT:

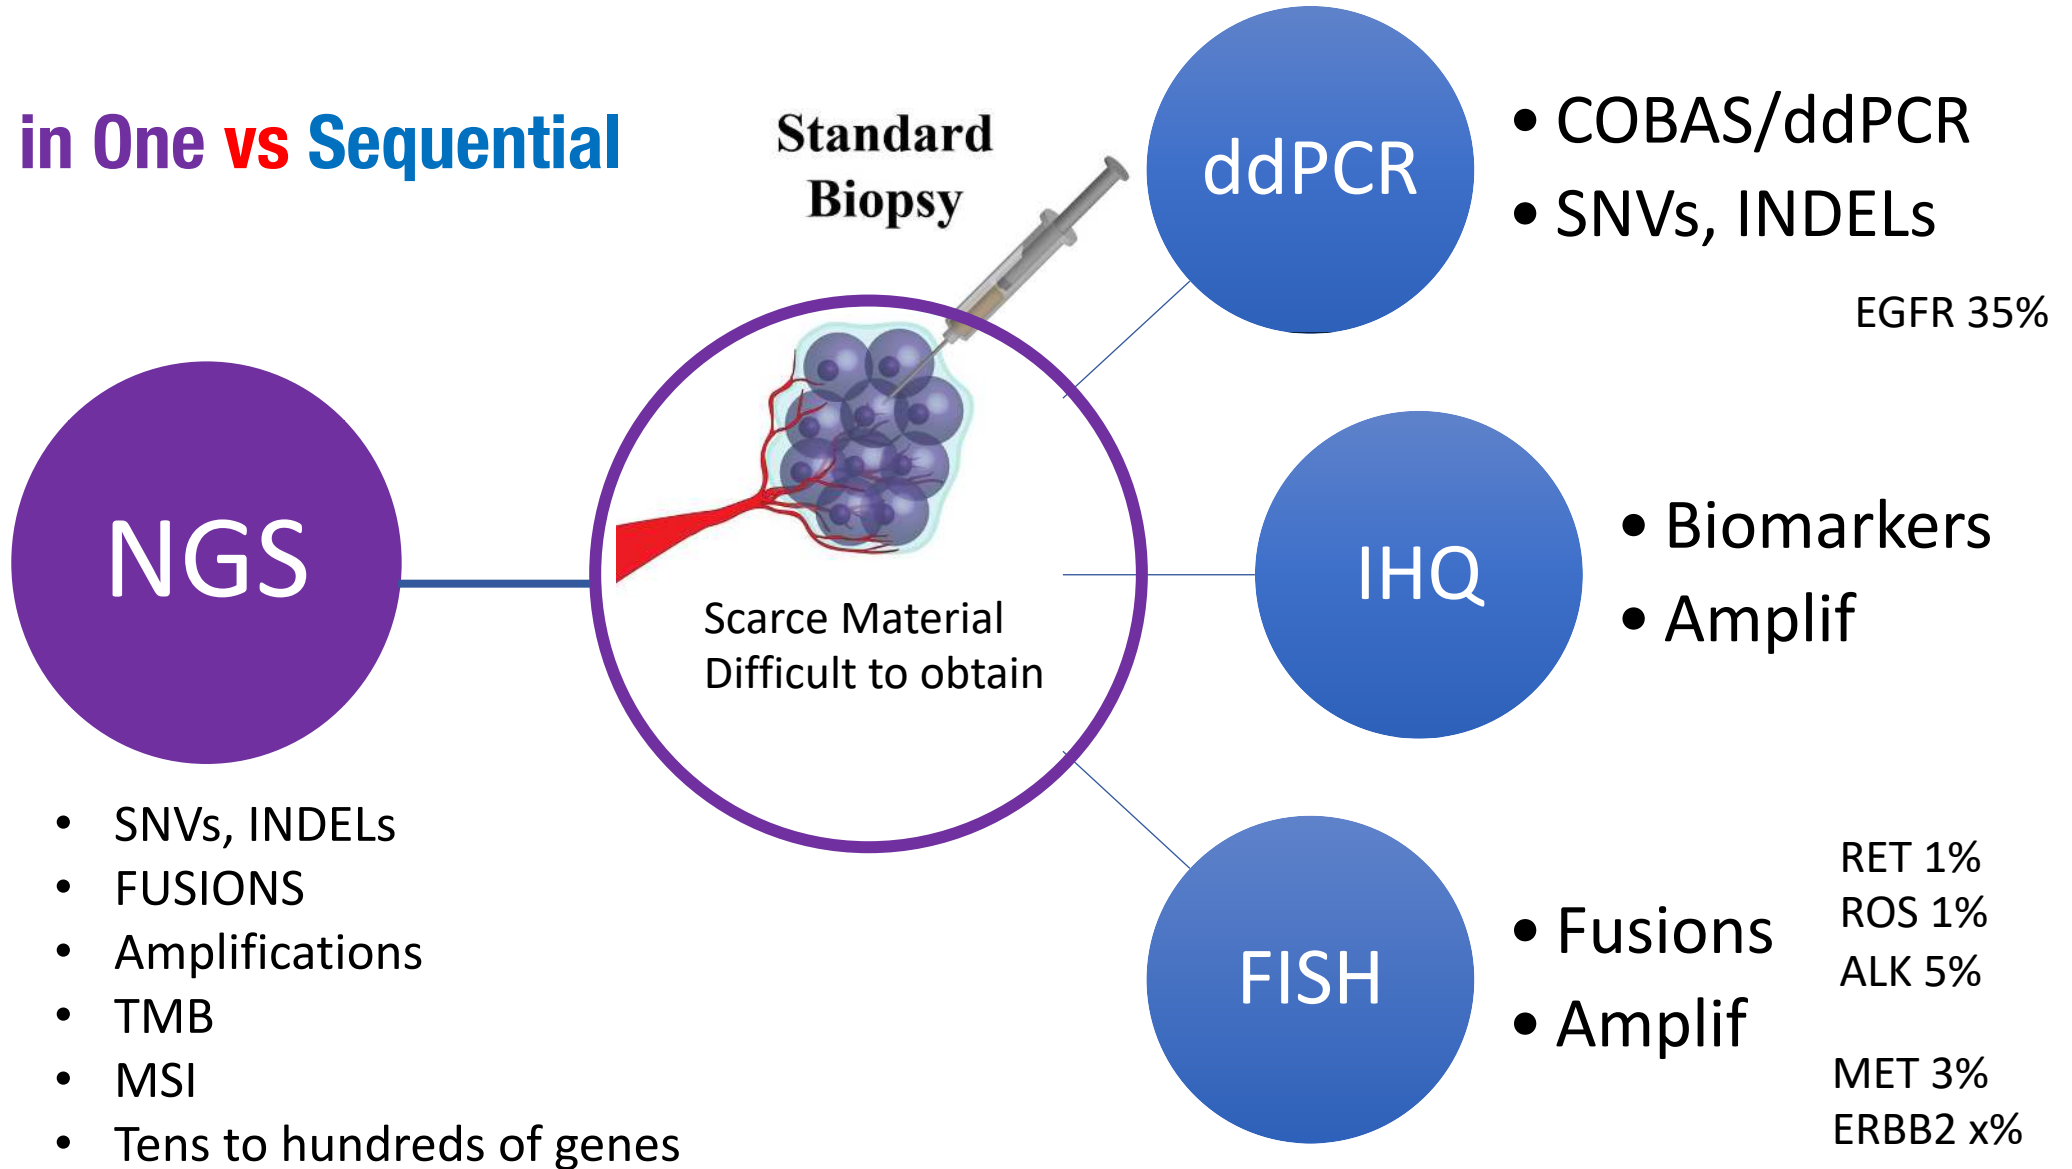

- APC = 82%
  - TP53 = 67%
  - KRAS = 42%
  - BRAF = 7%
  - HER2 = 5%
- 
- MSI-H = 5%

### Standard Biopsy

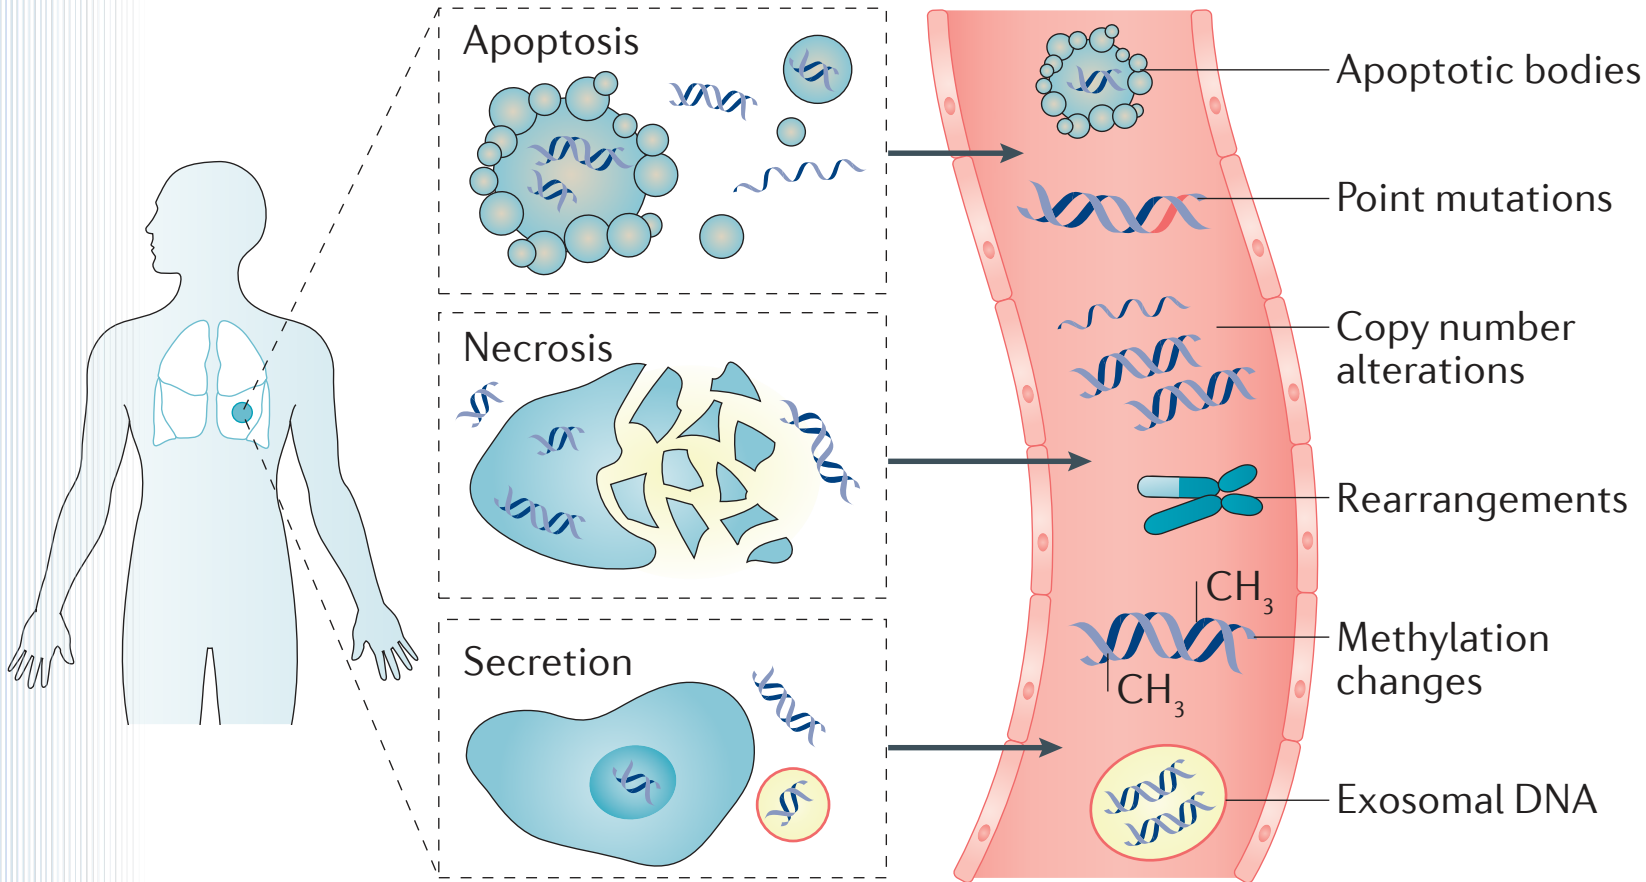

- ✓ Heterogeneo
- ✓ Escaso material
- ✓ invasivo
- ✓ Gold standard

VS.

### Liquid Biopsy

- ✓ Mas homogéneo
- ✓ Fácil re-biopsia
- ✓ No invasivo
- ✓ En desarrollo

**ctDNA vida media:**  
16 min a 2.5hs

**Ventajas:**

- Foto a tiempo real
- Monitoreo en tiempo = película
- No invasivo
- Menos heterogéneo que tejido

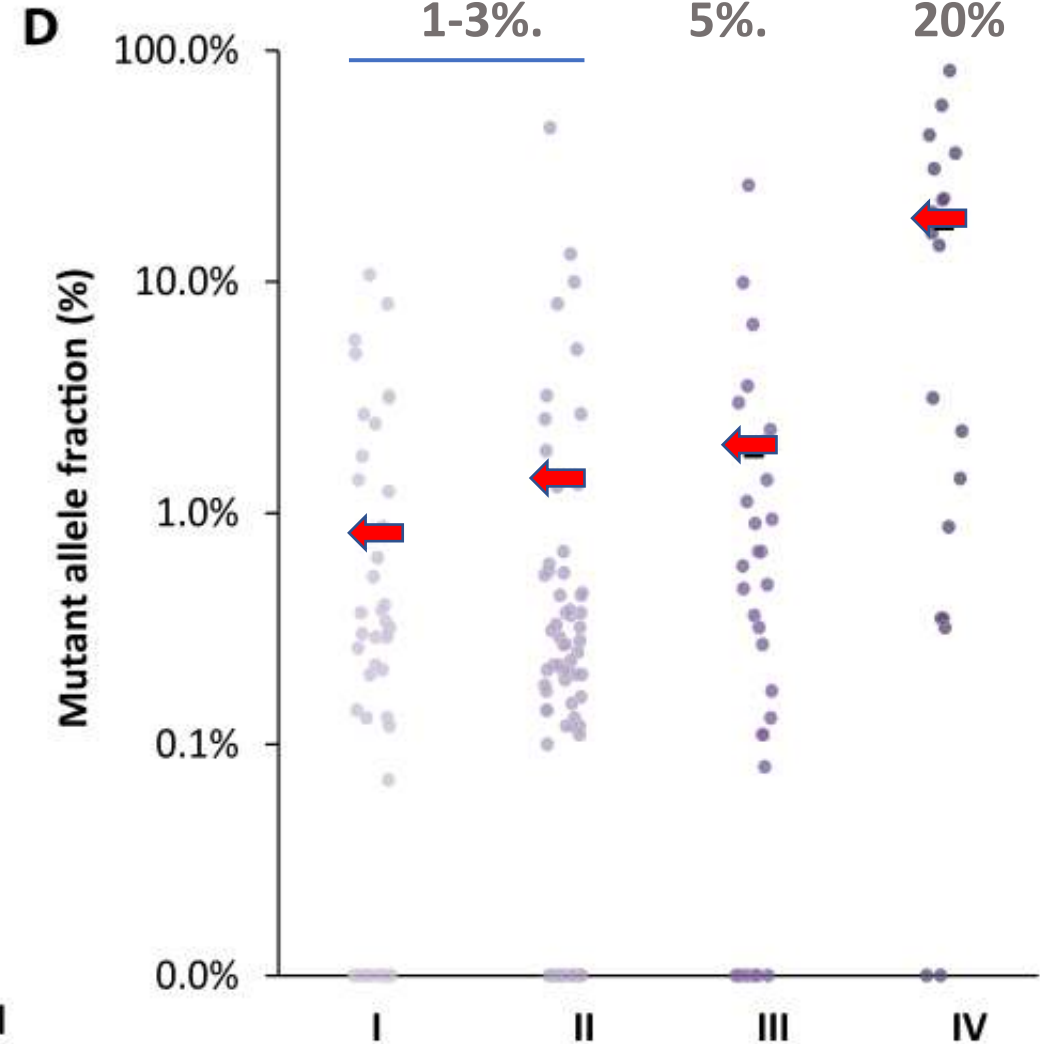

**Desventajas:**

- Escaso material en plasma

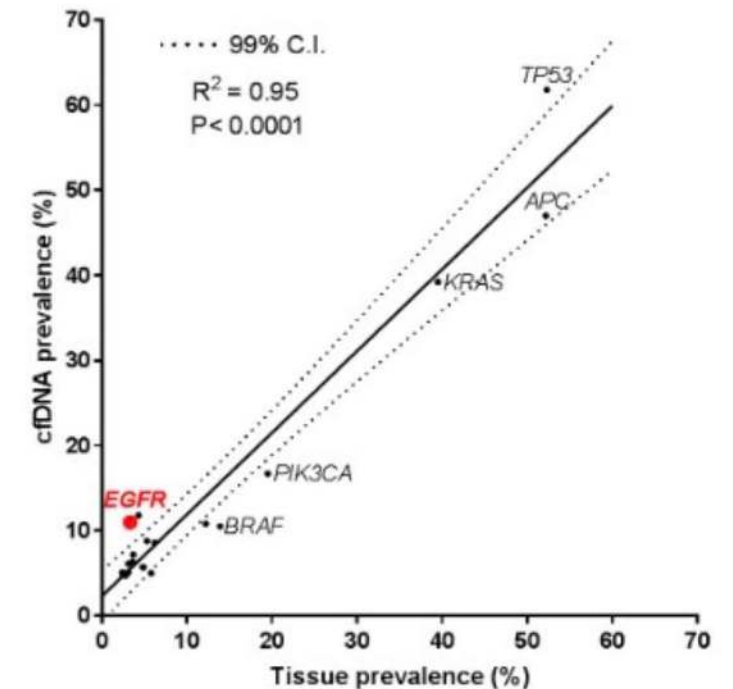

- Diagnóstico
- Pronóstico
- Predicción

# GI Cancers - ASCO 2019

## Tissue and plasma concordance in GI cancers

## GI Cancers - ASCO 2019

### Applications

Identifying actionable alterations

Ready for prime time

Predicting treatment response

Soon, more trials needed

Monitoring therapeutic resistance

Ready for prime time

Detection of residual disease post-surgery

Soon, more trials needed
